

WE CLAIM:

1. A blank for a container, comprising:
 - an inner back panel;
 - a first side panel foldably connected to said inner back panel;
 - a front panel foldably connected to said first side panel;
 - a second side panel foldably connected to said front panel;
 - an outer back panel foldably connected to said second side panel;
 - a connector panel foldably connected to said outer back panel; and
 - a cover panel foldably connected to said connector panel.
2. The blank of claim 1, further comprising divider panels formed in said inner back panel.
3. The blank of claim 2, wherein said divider panels are formed by cut lines in said inner back panel.
4. The blank of claim 2, wherein a divider extends from an edge of said inner back panel.
5. The blank of claim 1, wherein said outer back panel is wider than said inner back panel.
6. The blank of claim 1, further comprising a dispensing opening formed in said front panel.
7. The blank of claim 6, further comprising a shelf formed below said dispensing opening.

8. The blank of claim 7, further comprising a notch formed in said inner back panel in an edge opposite said first side panel.

9. The blank of claim 1, further comprising a line of weakness in said connector panel.

10. The blank of claim 9, wherein said line of weakness is a tear strip.

11. The blank of claim 1, further comprising a top closure connected to a top edge of said blank and a bottom closure connected to a bottom edge of said blank.

12. A carton comprising:

a front panel;

a first side panel and a second side panel extending from said front panel;

an inner back panel extending from said first side panel; and

an outer back panel extending from said second side panel and overlying said inner back panel.

13. The carton of claim 12, further comprising:

a connector panel extending from said outer back panel and overlying said first side panel; and

a cover panel extending from said connector panel and overlying said front panel.

14. The carton of claim 13, further comprising a line of weakness in said connector panel.

15. The carton of claim 14, wherein said line of weakness is a tear strip.

16. The carton of claim 12, further comprising divider panels folded up from said inner back panel.

17. The carton of claim 16, further comprising a dispensing opening in said front panel.

18. The carton of claim 17, further comprising a shelf at the bottom of said dispensing opening, said shelf foldably connected to the bottom edge of said dispensing opening and extending toward said inner back panel.

19. The carton of claim 18, further comprising a notch in said inner back panel, said notch forming an edge for supporting said shelf.

20. The carton of claim 12, wherein said outer back panel is wider than said inner back panel.

21. The carton of claim 16, further comprising:
a connector panel extending from said outer back panel and overlying said first side panel; and
a cover panel extending from said connector panel and overlying said front panel.

22. The carton of claim 21, further comprising a line of weakness in said connector panel.

23. The carton of claim 22, wherein said line of weakness is a tear strip.
